

Keynote address 2: Tuesday, 6 December 2005

Better questions?

Professor Erica McWilliam
Faculty of Education
Queensland University of Technology

Professor John Gough
Faculty of Information Technology
Queensland University of Technology

Abstract/synopsis

This keynote presentation brings together perspectives from computing science and cultural theory to consider whether 'Balance, Fidelity and Mobility' are indeed the means by which agendas will be advanced for educational technology. The two presenters, Erica McWilliam and John Gough, will explore the usefulness or otherwise of the conference theme from their different theoretical locations, before moving on to consider what might count as 'better questions'. Their presentation will be dialogic in nature, as they track their thinking about the nature and purposes of educational technology against a fluid background of contexts, ideas and applications.
